## Responsive Web Design Delivers an Incredible Digital Experience on Multiple Screens

*Add Consistency to Your Digital Presence with Responsive Web Design*

Over the last 10 years, technology has advanced at an incredible rate. To the surprise of some in the business world, consumers have evolved just as quickly as mobile computing devices. This behavioral shift means that a customer's experience with your brand could span across multiple times and devices. A responsive web design solution enables you to build consistent digital properties that deliver a quality experience on every screen imaginable.

When your website's user experience and design is uniform on a desktop, tablet and smartphone, you prolong and encourage interaction with your digital properties, and will convert more visitors into customers. However, any discrepancy in the look, feel or usability of your digital properties will fall well below consumer expectation and potentially halt their experience with your brand.

**Implementing WSI's responsive web design solutions will empower you to cater your customer experience to your audience's behavioral and technological expectations. We can help you build and maintain future-proof, conversion-focused digital properties.**

### Solution features include:

- ▶ Testing of your current digital properties on all relevant mobile or tabletop devices
- ▶ Analysis and assessment of test results
- ▶ Proposed plan of action to improve user experience with responsive web design
- ▶ Assistance and delivery of responsive web designs across all properties
- ▶ Full support through implementation and testing of new designs
- ▶ Setup of campaign tracking for responsive web layouts
- ▶ Ongoing performance monitoring to provide the best ROI
